

INSTALLATION MANUAL

FOR UNIVERSAL POST 130/150 CM

INTENDED FOR ENELION EV CHARGERS

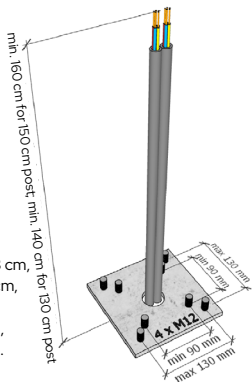

THE SET INCLUDES:

- post with the height of 130/150 cm – 1 pc,
- Ø40 mm plug for holes – 2 pcs.

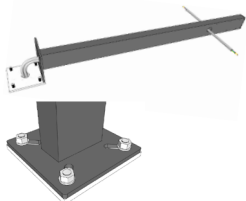

REQUIREMENTS FOR THE INSTALLATION AREA:

- minimum dimensions of stable ground surface – 20 x 20 cm,
- maximum distance between mounting pins – 13 x 13 cm,
- minimum distance between mounting pins – 9 x 9 cm,
- minimum length of power cables:
 - 140 cm for post with the height of 130 cm,
 - 160 cm for post with the height of 150 cm.

The post can be mounted by screwing it to a ready-made Enelion prefabricated element, mounting base prepared from the Enelion foundation kit or directly to a solid, robust ground surface using suitably strong mounting bolts.

Place the post close to the installation area in a horizontal position. Run the power cables through the post from the base to Ø40 mm holes in the top part of the post.

Screw the post to the ground.

Cut holes in Ø 40 mm plugs that are 5 mm smaller in diameter than the dimension of the power cable. Put the plugs on the power cables. Insert the plugs into the holes of the post.
